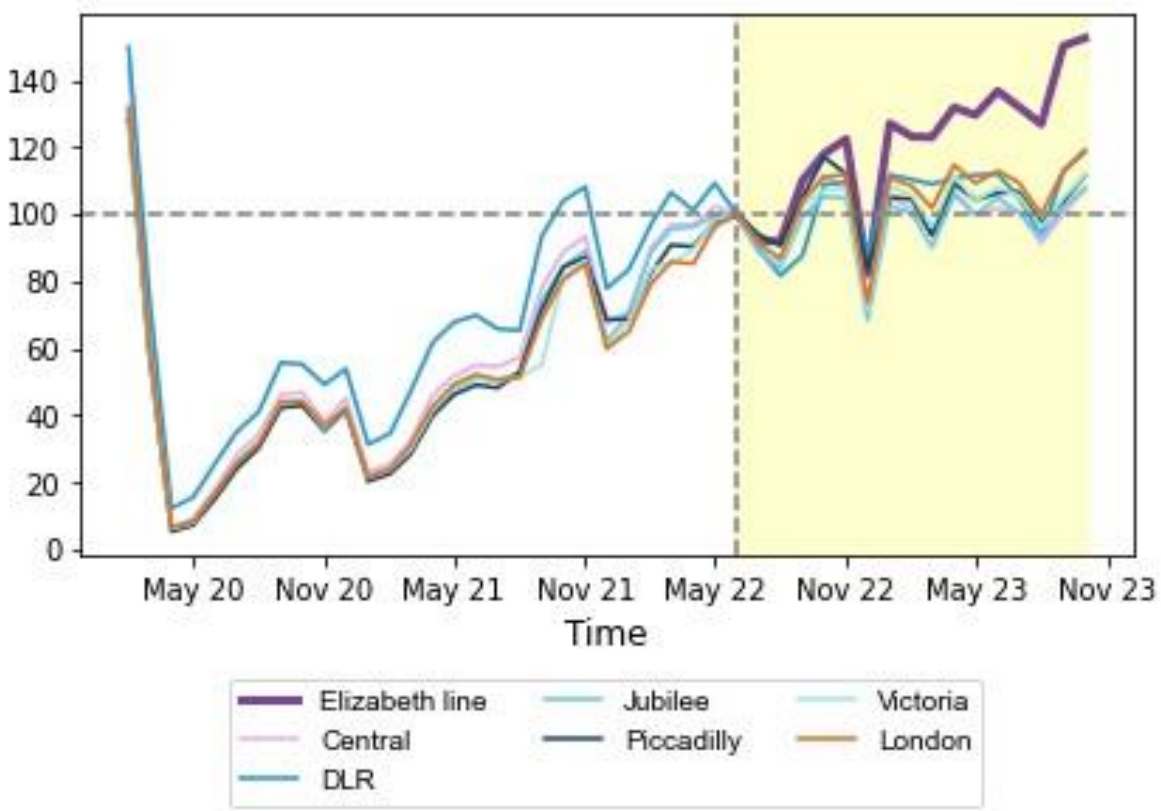

Figure 16: Average weekday boarders during peak times (June 2022 = 100) (Source: DUNNART, TfL)

Line	Nov-21	Jun-22	Nov-22	Jun-23	Oct-23
London (All TfL lines)	85	100	112	113	119
Central	93	100	107	102	108
DLR	108	100	110	112	119
Elizabeth Line	0	100	122	137	153
Jubilee	89	100	105	105	108
Piccadilly	87	100	112	106	111
Victoria	86	100	108	108	112

As shown above in Figure 16, average daily boarder growth on the Elizabeth line surpassed all other comparator and parallel lines (Central, DLR, Jubilee, Piccadilly, Victoria), growing by 53 per cent between June 2022 and October 2023. However, London as a whole and the Victoria line (comparator line) increased more than parallel lines in relative terms, which suggests that in the absence of the Elizabeth line, parallel lines might have grown more, and that the Elizabeth line overall acted at least partially as a substitute to the Central, Jubilee and Piccadilly lines, although not for the DLR.

In October 2023, the part of the Elizabeth line with the largest share of boarders was the Paddington to Whitechapel branch (44 per cent of total) and the smallest share was the
